

Minutes of Meeting (MoM)

Subject: Networking

Date: 25/5/26

Prepared by: Ishi Singhal

Attendies: Aditya Yoela, Mitul Agarwal, Mohd Arham, Moksh Shah, Sameer Saad, Santosh Bala, Vignesh Das, Aaryan, Ishi Singhal

Agenda:

Introduction of Networking, client-server models, Websockets, Streaming and Embedded protocols.

Meeting Summary:

1. Network

Introduction to what is a network, networking. Following that IP address and its classes were explained with the help of an example. And then the concept of MAC Address was discussed along with router and switch. LAN, WAN and Internet was also discussed.

2. Client-Server Models

Then client, server, port and socket were explained with the help of an example.

3. TCP vs UDP

TCP, UDP and SSH concept were discussed.

4. Websockets

Talked about how HTTP works and then how WebSocket help resolve the issue.

5. MQTT

The session proceeded with the concept of MQTT being a Publisher-Subscriber model and having a broker. Workflow of MQTT and quality of service level (QoS) were covered.

6. Streaming Protocol

Concept of RTSP, RTP, WebRTC, UDP, GStreamer were talked about. For WebRTC flow: signaling, finding the best route to find data, STUN, TURN, ICE concepts were explained. For GStream the three categories: Source, Converter, and Sink were

explained.

7. Embedded Protocol

UART and I2C were briefly talked about.
